| List of works for installation of water flow and pressure measurement and control equipment with necessary and adequate fittings |  |  |  |
| :---: | :---: | :---: | :---: |
| Pipeline for connecting the new tank with the manhole for measurement and control equipment OD225 PN6 |  |  |  |
| Item number | Description | Unit | Quantity |
| 1. Prepearing on site construciton field |  |  |  |
| 1.1 | Pipeline survey | m | 20.00 |
| 2. Earth works |  |  |  |
| 2.1 | Combined earth excavation (machine and manual) for pipeline trench with a width of 0.9 m and a depth of up to 1.2 m in III and IV category of soil. Support for an average pressure should be uesed of depths greater than 0.9 m . |  |  |
|  | Machine exacvation 90\% | $\mathrm{m}^{3}$ | 21.60 |
|  | Manual exacvation 10\%: | $\mathrm{m}^{3}$ | 2.40 |
| 2.2 | Planning the bottom of the trench with an accuracy of $\pm 2 \mathrm{~cm}$. | $\mathrm{m}^{2}$ | 16.00 |
| 2.3 | Supply, transport and installation with compaction of layer of sand with tickness of 10 cm . | $\mathrm{m}^{3}$ | 1.60 |
| 2.4 | Supply, transport and installation of sand around the pipe and 30 cm above it, with compaction in layers of 30 cm with material with a maximum grain size of 31.5 mm with manual compaction up to $95 \%$, according to the standard Proctor test. | $\mathrm{m}^{3}$ | 7.20 |
| 2.5 | Backfilling the trench with earth selected from the excavation. The backfill should be in layers of 30 cm with manual and machine compaction. Where there is no asphalt | $\mathrm{m}^{3}$ | 12.80 |
| 2.6 | Removing of the remaing material from the excavation at a distance of maximum 10 km , with uploading and spreading it at the place of unloading. | $\mathrm{m}^{3}$ | 2.40 |
| Single BOQ for manhole for measurement and control equipment |  |  |  |
| Item number | Description | Unit | Quantity |
| 3. Earth works |  |  |  |
| 3.1 | Combined earth excavation in a wide excavation with a slope of 1:3 for the manhole | $\mathrm{m}^{3}$ |  |
|  | Machine exacvation 80\% |  | 41.86 |
|  | Manual exacvation 20\% |  | 10.47 |
| 3.2 | Supply, transport and installation of gravel below the bottom of the manhole $\mathrm{d}=20 \mathrm{~cm}$. | $\mathrm{m}^{3}$ | 3.01 |

| 3.3 | Installation with compaction of earthen material for backfilling the construction pit. The backfill should be in layers of 30 cm with manual and machine compaction. | $\mathrm{m}^{3}$ | 26.27 |
| :---: | :---: | :---: | :---: |
| 3.4 | Removing of the remaing material from the excavation at a distance of maximum 10 km , with uploading and spreading it at the place of unloading. | $\mathrm{m}^{3}$ | 22.87 |
| 4. Concrete and reinforcement works |  |  |  |
| 4.1 | Supply, transport and installation of lean concrete with $\mathrm{d}=10 \mathrm{~cm}$. | $\mathrm{m}^{3}$ | 1.20 |
| 4.2 | Supply, transport and installation of concrete MB30 for: | $\mathrm{m}^{3}$ |  |
|  | Bottom plate with $\mathrm{d}=20 \mathrm{~cm}$ |  | 2.13 |
|  | Walls with $\mathrm{d}=20 \mathrm{~cm}$ |  | 7.78 |
|  | Top plate with $\mathrm{d}=20 \mathrm{~cm}$ |  | 2.08 |
| 4.3 | Supply, transport and installation of concrete MB30 fo the support of the fittings. | $\mathrm{m}^{3}$ | 0.20 |
| 4.4 | Supply, transport, cutting and installation of reinforcement | kg |  |
|  | MA 500/600, Q335 ( $\varnothing 8 / 15 \mathrm{~cm}$ ) |  | 599.50 |
|  | RA 400/500 Ø12 |  | 59.95 |
|  | RA 400/500 Ø8 |  | 14.99 |
|  | Wasting 5\% |  | 33.72 |
|  | Total |  | 708.16 |
| 4.4 | Supply, transport and installation of stair made of reinforcement $\varnothing 18 \mathrm{~mm}$ (every stair $L=0,66 \mathrm{~m}$ reinforcement $\phi 18 \mathrm{~mm}$ ). The stairs should be at a distance of 30 cm from each other along the height of the shaft | piece | 1.00 |
| New tank |  |  |  |
| Item number | Description | Unit | Quantity |
| 5 | Deinstalation and reinstallation of Q90 DN200 piece Q90 DN200 piece with installation of new gaskets | piece | 1.00 |
| Single BOQ for manhole for flow measurement at Jankovec |  |  |  |
| Item number | Description | Unit | Quantity |
| 6. Earth work |  |  |  |
| 6.1 | Combined earth excavation in a wide excavation with a slope of 1:3 for the manhole | $\mathrm{m}^{3}$ |  |
|  | Machine exacvation 80\% |  | 25.78 |
|  | Manual exacvation 20\% |  | 6.44 |

| 6.2 | Supply, transport and installation of gravel below the bottom of the manhole $\mathrm{d}=20 \mathrm{~cm}$. | $\mathrm{m}^{3}$ | 1.35 |
| :---: | :---: | :---: | :---: |
| 6.3 | Installation with compaction of earthen material for backfilling the construction pit. The backfill should be in layers of 30 cm with manual and machine compaction. | $\mathrm{m}^{3}$ | 20.39 |
| 6.4 | Removing of the remaing material from the excavation at a distance of maximum 10 km , with uploading and spreading it at the place of unloading. | $\mathrm{m}^{3}$ | 10.64 |
| 7. Concrete and reinforcement works |  |  |  |
| 7.1 | Supply, transport and installation of lean concrete with $\mathrm{d}=10 \mathrm{~cm}$. | $\mathrm{m}^{3}$ | 0.48 |
| 7.2 | Supply, transport and installation of concrete MB30 for: | $\mathrm{m}^{3}$ |  |
|  | Bottom plate with $\mathrm{d}=20 \mathrm{~cm}$ |  | 0.80 |
|  | Walls with $\mathrm{d}=20 \mathrm{~cm}$ |  | 2.56 |
|  | Top plate with $\mathrm{d}=20 \mathrm{~cm}$ |  | 0.74 |
| 7.3 | Supply, transport and installation of concrete MB30 fo the support of the fittings. | $\mathrm{m}^{3}$ | 0.20 |
| 7.4 | Supply, transport, cutting and installation of reinforcement | kg |  |
|  | MA 500/600, Q335 (Ø8/15cm) |  | 205.00 |
|  | RA 400/500 Ø12 |  | 20.50 |
|  | RA 400/500 ø8 |  | 5.13 |
|  | Wasting 5\% |  | 11.53 |
|  | Total |  | 242.16 |
| 7.5 | Supply, transport and installation of stair made of reinforcement $\varnothing 18 \mathrm{~mm}$ (every stair $L=0,66 \mathrm{~m}$ reinforcement ф 18 mm ). The stairs should be at a distance of 30 cm from each other along the height of the shaft | psc | 1.00 |
| Single BOQ for flow measurement point at Pump Station CarevDvor |  |  |  |
| Item number | Description | Unit | Quantity |
| 8. Preparatory works |  |  |  |
| 8.1 | Dismantling of the old fittings | lump <br> sum | 1.00 |
| Single BOQ for Electric valve DN150 |  |  |  |
| Item number | Description | Unit | Quantity |
| 9. Preparatory works |  |  |  |

| 9.1 | Excavatipon for access to a permanent PVC pipe in front of and after the permanent manhole and cutting of the permanent PVC DN250 pipe for placing the valve with the backfilling the earth to its original position | lump sum | 1.00 |
| :---: | :---: | :---: | :---: |
| Single BOQ for Automatic air valve DN50 on pipeline HDPE OD225 |  |  |  |
| Item number | Description | Unit | Quantity |
| 10. Earth work |  |  |  |
| 10.1 | Combined earth excavation in a wide excavation with a slope of 1:3 for the manhole | $\mathrm{m}^{3}$ |  |
|  | Machine 4xcavation 80\% |  | 10.61 |
|  | Manual 4xcavation 20\% |  | 2.65 |
| 10.2 | Supply, transport and installation of gravel below the bottom of the manhole $\mathrm{d}=20 \mathrm{~cm}$. | $\mathrm{m}^{3}$ | 1.15 |
| 10.3 | Installation with compaction of earthen material for backfilling the construction pit. The backfill should be in layers of 30 cm with manual and machine compaction. | M ${ }^{3}$ | 6.85 |
| 10.4 | Removing of the remaing material from the excavation at a distance of maximum 10 km , with uploading and spreading it at the place of unloading. | M ${ }^{3}$ | 5.44 |
| 11. Concrete and reinforcement works |  |  |  |
| 11.1 | Supply, transport and installation of lean concrete with $\mathrm{d}=10 \mathrm{~cm}$. | $\mathrm{m}^{3}$ | 0.40 |
| 11.2 | Supply, transport and installation of concrete MB30 for: | $\mathrm{m}^{3}$ |  |
|  | Bottom plate with $\mathrm{d}=20 \mathrm{~cm}$ |  | 0.65 |
|  | Walls with $\mathrm{d}=20 \mathrm{~cm}$ |  | 0.59 |
|  | Top plate with $\mathrm{d}=20 \mathrm{~cm}$ |  | 1.68 |
| 11.3 | Supply, transport and installation of concrete MB30 fo the support of the fittings. | M ${ }^{3}$ | 0.10 |
| 11.4 | Supply, transport, cutting and installation of reinforcement | kg |  |
|  | MA 500/600, Q335 ( $\varnothing 8 / 15 \mathrm{~cm}$ ) |  | 200.47 |
|  | RA 400/500 ø12 |  | 20.05 |
|  | RA 400/500 ø8 |  | 5.01 |
|  | Wasting 5\% |  | 11.28 |
|  | Total |  | 236.80 |
| 11.5 | Supply, transport and installation of stair made of reinforcement $\varnothing 18 \mathrm{~mm}$ (every stair $L=0,66 \mathrm{~m}$ reinforcement $\phi 18 \mathrm{~mm}$ ). The stairs should be at a distance of 30 cm from each other along the height of the shaft | pSC | 1 |
| Single BOQ for Automatic air valve DN50 on pipeline HDPE OD110 |  |  |  |

| Item number | Description | Unit | Quantity |
| :---: | :---: | :---: | :---: |
| 12. Earth work |  |  |  |
| 12.1 | Combined earth excavation in a wide excavation with a slope of 1:3 for the manhole | $\mathrm{m}^{3}$ |  |
|  | Machine exacvation 80\% |  | 10.61 |
|  | Manual exacvation 20\% |  | 2.65 |
| 12.2 | Supply, transport and installation of gravel below the bottom of the manhole $\mathrm{d}=20 \mathrm{~cm}$. | $\mathrm{m}^{3}$ | 1.15 |
| 12.3 | Installation with compaction of earthen material for backfilling the construction pit. The backfill should be in layers of 30 cm with manual and machine compaction. | $\mathrm{m}^{3}$ | 6.85 |
| 12.4 | Removing of the remaing material from the excavation at a distance of maximum 10 km , with uploading and spreading it at the place of unloading. | $\mathrm{m}^{3}$ | 5.44 |
| 13. Concrete and reinforcement works |  |  |  |
| 13.1 | Supply, transport and installation of lean concrete with $\mathrm{d}=10 \mathrm{~cm}$. | $\mathrm{m}^{3}$ | 0.40 |
| 13.2 | Supply, transport and installation of concrete MB30 for: | $\mathrm{m}^{3}$ |  |
|  | Bottom plate with $\mathrm{d}=20 \mathrm{~cm}$ |  | 0.65 |
|  | Walls with $\mathrm{d}=20 \mathrm{~cm}$ |  | 0.59 |
|  | Top plate with $\mathrm{d}=20 \mathrm{~cm}$ |  | 1.68 |
| 13.3 | Supply, transport and installation of concrete MB30 fo the support of the fittings. | $\mathrm{m}^{3}$ | 0.10 |
| 13.4 | Supply, transport, cutting and installation of reinforcement | kg |  |
|  | MA 500/600, Q335 ( $\varnothing 8 / 15 \mathrm{~cm}$ ) |  | 200.47 |
|  | RA 400/500 Ø12 |  | 20.05 |
|  | RA 400/500 ø8 |  | 5.01 |
|  | Wasting 5\% |  | 11.28 |
|  | Total |  | 236.80 |
| 13.5 | Supply, transport and installation of stair made of reinforcement $\varnothing 18 \mathrm{~mm}$ (every stair $L=0,66 \mathrm{~m}$ reinforcement $\phi 18 \mathrm{~mm}$ ). The stairs should be at a distance of 30 cm from each other along the height of the shaft | piece | 1.00 |
| Single BOQ for type hydrant DN80 for pipeline HDPE OD225 |  |  |  |
| Item number | Description | Unit | Quantity |
| 14. Concrete and reinforcement works |  |  |  |

| 14.1 | Supply, transport and installation of concrete MB30 for anchor $A / B / H=75 / 20 / 20 \mathrm{~cm}$ : | $\mathrm{m}^{3}$ | 0.03 |
| :---: | :---: | :---: | :---: |
| 14.2 | Supply, transport and installation of concrete MB30 for support for hydrant cap and cap $\mathrm{AB} / \mathrm{H}=120 / 40 / 10 \mathrm{~cm}$ : | $\mathrm{m}^{3}$ | 0.05 |
| 15. Instalation works |  |  |  |
| 15.1 | Supply, transport and installation of T piece - tapper OD225/90. The joining of the pipes is with front welding. | piece | 1.00 |
| 15.2 | Supply, transport and installation of pipes PEHD PE100 OD225 PN10, $\mathrm{L}=1000 \mathrm{~mm}$. The joining of the pipes is with front welding. | piece | 1.00 |
| 15.3 | Supply, transport and installation of hydrant cap | piece | 1.00 |
| 15.4 | Supply, transport and installation of cap | piece | 1.00 |
| Single BOQ for type hydrant DN80 for pipeline HDPE OD110 |  |  |  |
| Item number | Description | Unit | Quantity |
| 16. Concrete and reinforcement works |  |  |  |
| 16.1 | Supply, transport and installation of concrete MB30 for anchor $A / B / H=75 / 20 / 20 \mathrm{~cm}$ : | $\mathrm{m}^{3}$ | 0.03 |
| 16.2 | Supply, transport and installation of concrete MB30 for support for hydrant cap and cap $A B / H=120 / 40 / 10 \mathrm{~cm}$ : | $\mathrm{m}^{3}$ | 0.05 |
| 17. Instalation works |  |  |  |
| 17.1 | Supply, transport and installation of T piece - tapper OD110/90. The joining of the pipes is with front welding. | piece | 1.00 |
| 17.2 | Supply, transport and installation of pipes PEHD PE100 OD110 PN10, $\mathrm{L}=1000 \mathrm{~mm}$. The joining of the pipes is with front welding. | piece | 1.00 |
| 17.3 | Supply, transport and installation of hydrant cap | piece | 1.00 |
| 17.4 | Supply, transport and installation of cap | piece | 1.00 |
